

Baker Pool Service

Pool Opening

Pool Opening (2 hour minimum, typically takes 4 hours)

The opening process includes 3-4 visits over a 7 day period. The time of year and complexity of the pool will determine the number of visits needed.

1st Visit Remove pool cover, clean immediate deck area, brush pool surface and begin filling the pool.

2nd Visit Start-up pool equipment, open skimmers, install auto cleaner and make minor repairs to equipment if necessary. Add start-up chemicals and begin to balance the water chemistry.

3rd & 4th Visits Vacuum pool and perform final cleaning. Adjust water chemistry as needed. For salt water pools, we will inspect and clean the salt cell and add salt as needed. Clean filters to remove opening debris and set the stage for a successful season.

★★★★★

We strive to provide an exceptional full service pool opening experience, which requires very little involvement from our customers. Please notify our office if you do not want Baker Pool to complete the final steps of the opening outlined in the 3rd and 4th visits.

Clean and Store Pool Cover \$175
Additional Pool Cover \$75
