

Baker Pool Service

Pool Opening

Pool Opening (2 hour minimum, on average 4 hours)
The opening process consists of 2 - 3 visits over a 7-day period. The time of year and complexity of the pool factor into the number and length of visits needed.

Initial Visit Remove pool cover, clean immediate deck area and water line. Begin filling pool and start-up equipment. Test and balance water chemistry. Inspect equipment, making minor repairs if necessary. Inspect and install automatic cleaner.

Follow-up Visit(s) Clean filters and perform any additional cleaning and balancing to the water chemistry as needed. Double check equipment functionality, adjust water features, autofills, and schedules (if applicable). For saltwater pools, we will clean the salt cell and add salt if necessary.

We strive to provide an exceptional full-service pool opening experience, which requires very little involvement from our customers. Please let us know if you have any questions regarding our opening procedures.

Clean and Store Pool Cover.....\$180
Additional Pool Cover.....\$80
